"BABY FOOD FOR BABY CHICKS"

Pratts Buttermilk Baby Chick Food raises every good chick. It won't prevent losses from accidents, but it does prevent death from digestive troubles and the more common chick disorders which are so often due to improper feeding.

The original Baby Chick Food—PRATTS—contains all the food elements required to build muscle, bone and feather, to nourish the whole body, to give that strong start in life which assures rapid growth, even development and profitable maturity.

Feed the original Pratts for the first three weeks—the critical period—at least; it may profitably be used much longer. Refuse substitutes and imitations. These may be slightly less in *first cost*, but in *results*, as measured by *number and quality* of chicks reared, Pratts Buttermilk Baby Chick Food is

THE CHEAPEST FOOD ON EARTH

"Your money back if YOU are not satisfied."

INSURE LIVE STOCK HEALTH AND VIGOR

Don't permit your hard-working, heavy-producing or fast-growing animals to become run-down and out of condition. It's much easier and less expensive to keep them right than to restore them to perfect health.

The regular use of Pratts Animal Regulator absolutely insures health and vigor in live stock of all kinds. It keeps healthy animals in the pink of condition; it quickly puts half-sick, unprofitable stock in the money-making class.

Pratts Animal Regulator, America's original guaranteed Stock Tonic and Conditioner, is not a food. It is a combination of roots, herbs, spices and medicines which sharpen appetite and improves digestion, regulates the bowels, makes rich, red blood, and naturally invigorates the organs of production. It promotes growth, improves health and strength, increases production. And all at very little cost.

PRICE, Postpaid, small size, 36c.; medium size, 66c.; large size, \$1.30.

PRICE, by Express, small size, 30c.; medium size, 60c.; large size, \$1.20.

MORE PIGS PER HOG— MORE HOG PER PIG

Big litters of strong-boned, growthy pigs, and rapid growth of pigs from birth to maturity are the natural result of health and vigor of breeding stock and youngsters. Weak, run down boars and sows produce inferior pigs and usually small litters. And such pigs are not money makers.

PRATTS HOG TONIC

the guaranteed conditioner for swine, overcomes most hog diseases, makes the breeders healthy and vigorous, insures big litters of big pigs, makes the youngsters grow steadily and rapidly from birth to maturity and fatten quickly and economically.

Many of the most successful hog-growers will tell you that one secret of their success is the regular use of Pratts Hog Tonic. You should at least test it. No risk on your part because

STEADY BLUE FLAME
COMFORTABLE AND EASY TO
OPERATE
ECONOMY OF OPERATION

NO COAL, SMOKE OR GAS.

NO WICK TO TRIM
ABUNDANCE OF HEAT
NO OIL FUMES
VISIBLE OIL FEED
CONVENIENT AND SAFE

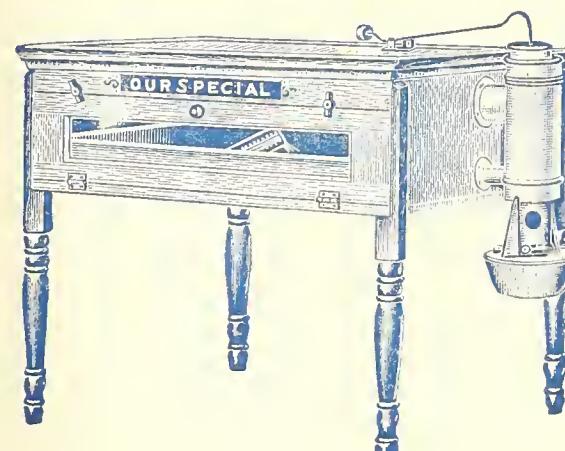

This Hover burns the gas generated from common coal oil. It has an 18-inch canopy and the same as our large hovers only it is smaller. They are made and operated on the same principle as our large colony hover except the oil reservoir is made of galvanized steel and the drops of oil are regulated by a valve so you can give as many or as few drops as are necessary to obtain the desired amount of heat. When the valve is once set properly it needs no further attention, only to fill the oil reservoir when needed. It has the same visible oil feed as our large hover. Our ventilators in the top of our hovers carry away all foul air, caused by the chicks, automatically.

They are packed everything complete with full directions in a carton so that they can be safely shipped by parcel post, express or freight. If ordered shipped by parcel post add amount of postage with your remittance.

Reliable Special Incubator

RELIABLE BECAUSE RIGHT

70 and 140 Egg Special

Our Special Incubator Compared With Standard Line

Our special line is made of the same grade material as our standard, has the same regulating, the same double heating device, the same ventilating and moisture system. Our special has all the important points for hatching that is contained in the standard. The difference between the standard and the special are, the standard has two doors, the special has one, the standard has lamp encased, the special has lamp on outside at end, the standard has nursery beneath the egg tray, the Special has none. The standard has two wood walls, the Special 140-size has one wood wall and one wall of heavy fibre board, 70-egg special has single walls, both the standard and the special have packing between the walls, the standard is 18 inches deep, the special 10 inches deep. The thermometer, burner, lamp wick, egg tray, egg tester, regulator and everything that goes with the standard incubator are included with the special. We will have machines made up so we can ship any order, large or small, within forty-eight hours from the time order is received.

All our incubators are shipped so when legs are attached they are set up ready to operate.

The reliable Blue Flame, Wickless, Oil Heated Colony Hover

THE MODERN HOVER

BURNS COAL OIL	NO WICK TO TRIM
STEADY BLUE FLAME	ABUNDANCE OF HEAT
COMFORTABLE AND EASY TO OPERATE.	NO OIL FUMES
ECONOMY OF OPERATION	VISIBLE OIL FEED
NO COAL, SMOKE OR GAS	
THE FLOW OF OIL IS REGULATED AUTOMATICALLY	

This is the most popular and most efficient hover we have ever manufactured, as proven by the many testimonials received:

You can always get coal oil, but it is hard to get hard coal. You can get any amount of heat with these hovers that is needed at all times.

It will do better work than the coal burning brooder, with less trouble, less risk of fire going out and with equal success of comfort of chicks entrusted to its care and with less cost.

By using the **RELIABLE BLUE FLAME WICKLESS OIL HEATED COLONY HOVER**, you save time, money and trouble and your chickens will grow faster, get heavier and thrive because our hover will take the very best care of them and keep them comfortable, happy and healthy.

These hovers have the same capacity as the Coal Burners provide, are made of galvanized steel, have angle steel legs and have a capacity with our 30-inch hover, 350 chickens or less, with our 42-inch hover of 500 chicks or less; with our 52-inch hover, 1,000 chicks or less.

We furnish a one-gallon self-feeder oil container so that you need have no fear of light going out, for it is simple and requires very little attention. It is equipped with a safety valve. After the valve is once properly adjusted according to directions you need not pay any more attention (for it regulates the drops of oil).

OUR VENTILATOR in top of cone of hover leaves out all foul air made by the chicks. This is done automatically without any bother to the operator and which insures steady and healthy growth of the chicks placed in its care.

OUR GUARANTEE is that this hover will do all we claim for it, and if not, if the hover is returned by the purchaser within 30 days, we will refund your money.

TO OUR CUSTOMERS:

Dear Sir:

We take this means to thank you for the liberal patronage you have given us the past year. While it is true, we were late starting in the Seed Business last year; even at this, we exceeded far beyond our expectation. Now that we are starting this year much better prepared to serve the trade, it will be much to your advantage to get Our Prices before buying. For this particular REASON, we make a specialty of supplying the Market Gardener and Farmer with the best strains of SEEDS that can be produced.

We handle absolutely nothing that we do not believe to be the best obtainable. Furthermore, we test and experiment on our Spring Garden Seed Farm, all new varieties, before offering them to the trade.

We do not claim to compete in prices with parties whose sole effort is to secure the lowest price Seeds regardless of Quality, for such Seeds are not cheap, but dear at any price. The first cost of Seeds is a small matter, compared with time and labor that must be expended upon a growing crop. Quality is our first thought, and the prices we offer are as low as First-Class Seed can be sold for.

We are not only seedsmen in name, but say to you that we have actually grown them for fourteen years, and have men with us that have been selling seed and growing them for a longer period. Therefore, we feel that we are in a position not only to sell you what you want, but to assist you in how to plant it. Although farmers have different ideas, we are willing at all times to give you all the benefit of our mens' experience.

We ask that you give us a part of your business, if only a trial order, so you may know what quality seed means.

Truly yours,

GRAY SEED COMPANY.

FARMOGERM

makes large supplies of Nitrates, which benefit greatly the growing of bigger crops by making poor soil *good soil*. It is always *fresh*—the only culture sold in the bottles with the patented stopper which enables the bacteria to breathe air, insuring long life without deterioration.

FARMOGERM means increase in all legume crops, such as peas, beans, alfalfa, clovers, peanuts, vetches. It makes possible the growing of two crops at the same time, each helping the other.

FARMOGERM is simple to apply, it being necessary only to fill the bottle three-quarters full of water, shake thoroughly to break up the jelly, sprinkle on the seed until all are moistened, permit the seed to dry, and then plant in the usual way.

FARMOGERM is sold in three sizes, as follows: Bottles containing enough bacteria to inoculate seed for five years, \$8.00; one acre, \$2.00; garden size (quarter acre), 50 cents.

FARMOGERM is prepared for Alfalfa, Clovers, Vetch, Cow Peas, Soy Beans, Peanuts, Lucerne, Peas, Beans, Sweet Peas and all Legumes.

This recognized standard of seed inoculants insures the growing of bigger crops by making poor soil *good soil*. It is always *fresh*—the only culture sold in the bottles with the patented stopper which enables the bacteria to breathe air, insuring long life without deterioration.

FARMOGERM is a culture of only high-bred nitrogen-fixing bacteria. It replaces essential elements in the soil in an effective and economical manner.

FARMOGERM, used on your seed, furnishes Nitrates to the plants. It increases their growth and enriches the soil.

When the seeds sprout the bacteria enters the root and makes possible the growing of two crops at the same time, each helping the other. Assures substantial saving in your fertilizer bill. Soils can be built up to a high standard of fertility at small cost and little labor.
